4th November 2026

Dear Parent/Carer

I hope this letter finds you well.

As you are aware, your child is at a pivotal stage of their school life, with their mock and final examinations approaching. I am writing to inform you of extra after school intervention in Science that is available, **week commencing 2nd November.**

Each intervention session focuses on a specific aspect of a specific paper and specific students are invited to attend when this area has been identified as an area that they need support with. This allows for students to really focus their revision and maximise their chances of achieving the best grades possible.

Your child has been identified as someone who would benefit from additional intervention in Science to ensure that they achieve their potential in the GCSE examinations this year.

We would like to invite your child to our after-school intervention for the next **two weeks (5th November & 12th November)** to focus on the topics of **chemical bonding** as these are areas that we have identified that your child struggled with in the last set of mock exams.

Science intervention takes place on **Thursdays 3:00pm – 4:00pm on the B2 corridor.**

Students will be supported by the Science team, some of whom are examiners, to work on key areas of revision and practise. This will help prepare them for their mock exams but also their independent revision prior to the real exam in May/June 2027.

We cannot overstate the importance of regular attendance at these interventions. Students who engage consistently give themselves the very best chance of achieving their target grades in the summer examinations and although the targeted intervention for this topic is only for the next two week, your child is welcome to join the open to all revision sessions that are happening at the same time each week throughout the year.

We therefore ask for your support in encouraging your child to attend Science interventions on Thursdays. By working together, we can help your child make the most of the support on offer and enable them to approach their exams with confidence.

Thank you in advance for your continuous support.

Yours faithfully

D Peck
